

Heavy Duty

This grade of sealant will provide a high level of tyre protection for a wide range of on-road and off-road vehicles. It is capable of sealing punctures up to 15mm in one revolution of the wheel without any noticeable loss of tyre pressure.

On-Road

Can be used in all road going tyres and is not speed restricted. We have treated large commercial fleets of vans and HGVs.

Off-Road

Provides protection from punctures which may occur in locations such as recycling, building, agricultural, and grounds care sites.

Benefits

- Seals punctures up to 15mm
- Seals up to 95% of punctures
- Increases tyre life by up to 20%
- Stops rim, bead, and other slow air leaks
- Prevents costly penalties for late deliveries
- Reduces fuel costs up to 3% by maintaining correct tyre pressures
- Avoids downtime waiting for tyre repair or replacements
- Usage of specialist tyre repair services is reduced
- Works in tubed and tubeless tyres

How it works

- 1) The product spreads evenly over the inside surface of the tyre as it rotates
- 2) The air loss from a puncture forces millions of fillers and fibres to interlock in the puncture site and form a permanent seal
- 3) The driver continues their journey

Heavy Duty

Customers

"When the tyres of all our vehicles have been treated, the total savings are expected to reach £27,600, before downtime costs"

"We have tried a variety of glue based sealants but nothing works as well as Air-Seal Products. This water based product is not only very easy to use, it repairs punctures from anything up to reinforcing bar, and also maintains correct tyre pressure."

"I can always rely on the team to assist with any technical questions or just for a friendly chat. Their customer service is top notch!"

"After many years of trying various puncture proof systems unsuccessfully, we discovered Air-Seal's Heavy Duty tyre sealant and were immediately impressed."

Supplied in:

20 litre pails

- Installation pump sold separately
- Traditional packaging
- E.G. will treat 1 eight wheeler truck

950ml bottles

- Available individually or in boxes of 12
- E.G. 1 bottle will treat approx. 2 van tyres

24 litre BIB

- 8 x 3 litre bags
- Installed directly into tyre chamber
- E.G. will treat 1 telehandler

4 litre jug

- Installation pump included
- E.G. will treat 1 ATV

1040 litre IBC

- For high volume customers

Application Examples

- Trucks
- Trailers
- Skip Wagons
- Coaches
- Tractors
- Mowers
- Dumpers
- Forklifts
